

SENIOR CAPSTONE MENTORS

Work with an industry pro this school year to make your work even better

What Can An Industry Mentor Do For Me?

1. **Give expert guidance** to help you troubleshoot and improve their work
2. **Coach skills** like communication, presentation, and project management
3. **Make career connections** and share about their own career journey

Here's how it works:

1. **Your teacher will register** your class, and then you'll submit your mentor request between **Nov. 1-8**. Your request will need to include:
 - a. EDD/CC: project summary (~150 words), and completed project proposal
 - b. BI: a summary (~250 words) on how you'll engage a mentor, and what you hope to learn
2. **Mentors will select the students they will work with** by late-Nov*
3. You'll connect with your **mentors at least once a month** (virtual or in-person)
4. Get further feedback by submitting to **Student Industry Connects** before February break
5. Students & mentors **celebrate in person at the Applied Learning Showcase on May 10th**!
